1 MT7620 WLAN Driver PA LNA Application Note

!!! IMPORTANT !!!

MT7620A/N Power Design (PA and LNA) Combination Application Note

1.1 Summary

MT7620A/N provides several power design combination, and MT7620 users MUST choose the correct power design option in Wi-Fi driver depending on the PA or LNA in H/W board design, otherwise the wrong choice would lead H/W board to unrecoverable damage!

1.2 Details

MT7620A/N has 3 power design as following:

- 1) Internal PA + Internal LNA (for example: MTK MT7620A/N RFB)
- 2) Internal PA + External LNA
- 3) External PA + External LNA (for example: MTK MT7620A Outdoor/HP RFB)

MT7620 users must choose the correct one according to the power design on the board. If you don't know which power design you are using, please contact the H/W engineer to make the correct choice.

Steps for building Wi-Fi driver in SDK :

Step 1. Check if the following 3 .bin files exist or not in SDK.

```
RT288x_SDK/source/vendors/Ralink/MT7620/MT7620_AP_2T2R-4L_external LNA_external PA_V15.BIN
RT288x_SDK/source/vendors/Ralink/MT7620/MT7620_AP_2T2R-4L_external LNA_internal PA_V15.BIN
RT288x_SDK/source/vendors/Ralink/MT7620/MT7620_AP_2T2R-4L_internal LNA_internal PA_V15.BIN
```

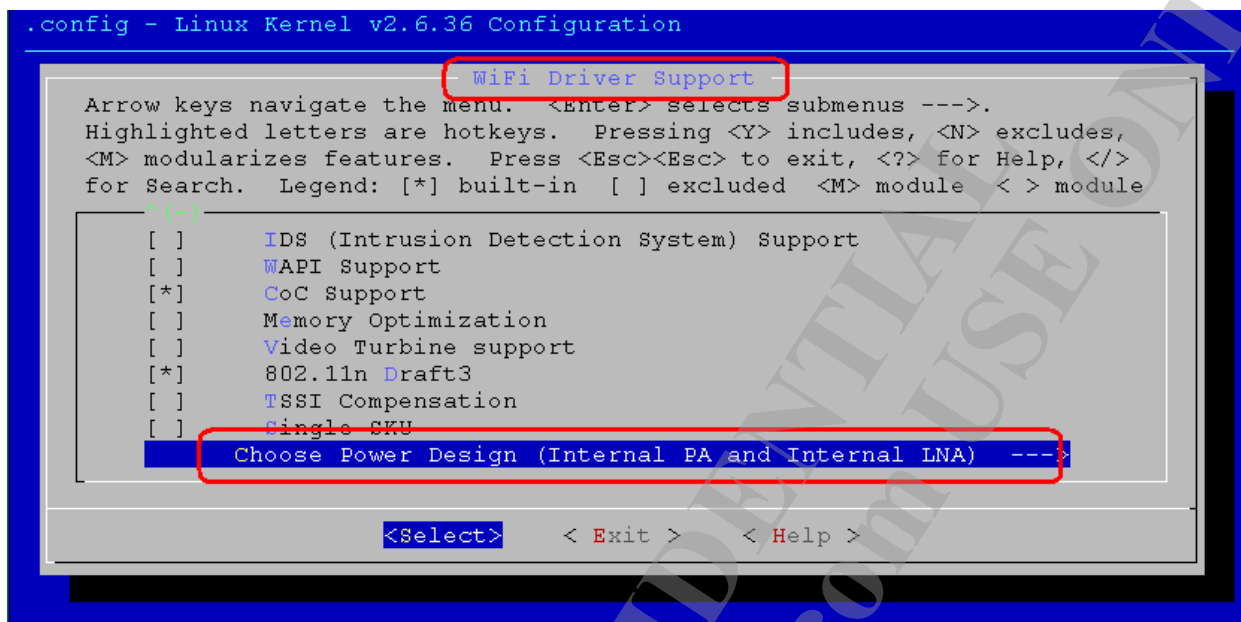

If not existed, please place the missing files to the directory from the latest SDK.

Step 2. Check if the following text line exists in the RT288x_SDK/source/vendors/Ralink/MT7620/Makefile or not.

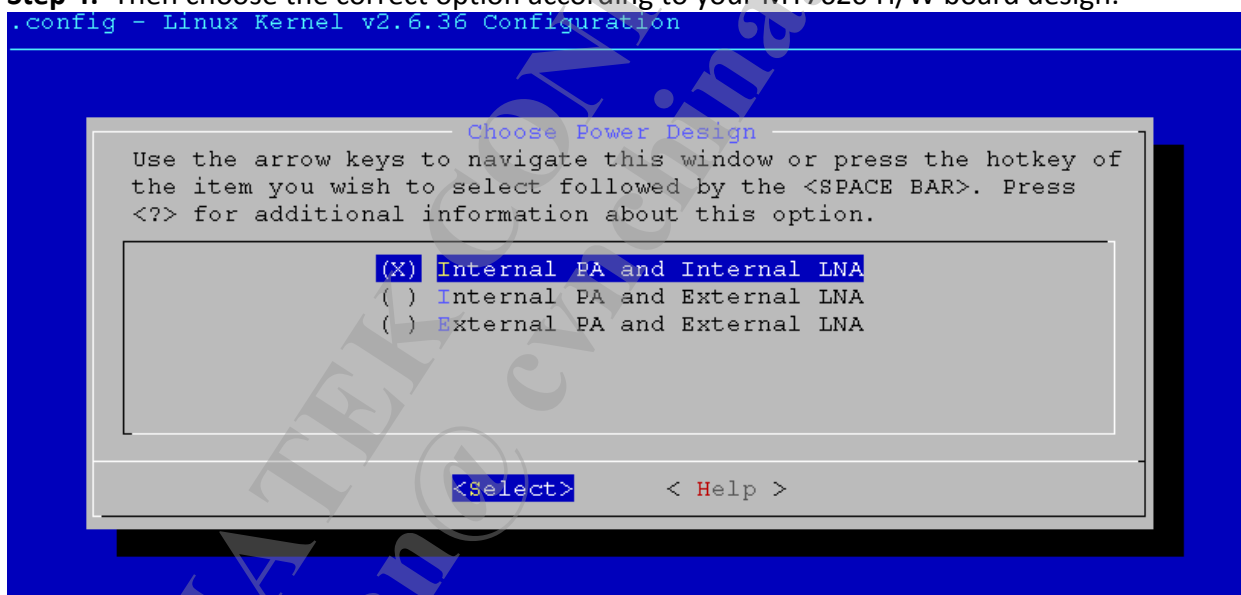

```
...
# Handle several power design for MT7620
...
```

If not, please upgrade the RT288x_SDK/source/vendors/Ralink/MT7620/Makefile from the latest SDK.

Step 3. Enter Wi-Fi Driver menu in SDK, choose **Power Design** as following:

Step 4: Then choose the correct option according to your MT7620 H/W board design.

Step5:

Type exit menu, then rebuild the SDK and Wi-Fi driver.

1.3 Possible Damage Scenario

The customer uses the external PA and external LNA on board, but **incorrectly** choose "Internal PA and Internal LNA" in the Wi-Fi driver. **The external PA on board may get damaged after loading the firmware and booting.**
